

EXPONA is World's First smart contract with dynamic registration fee running on Binance Smart Chain

Super fast way to make BNB with three types of income. BNB is peer-to-peer electronic money that features low fees and fast transaction time. BNB is the native token of Binance Smart Chain

EXPONA is the First ever smart contract with dynamic registration fee.

Cryptocurrency is a volatile asset and the price of any cryptocurrency can go UP & DOWN with time, a huge fluctuation of price can make a smart contract irrelevant in future. for example, famous ethereum based crowdfunding smart contract forsage started in Feb-2020 when price of ETH was \$230 for 1 ETH. As the registration fee to register on forsage is 0.05 ETH, if someone joined forsage at launching time he Purchased 0.05ETH for \$11.5 to register on forsage. And now, current price of ETH is increased manyfolds for 1 ETH, If someone join forsage today, he have to purchase same amount of ETH for more \$ than the user who registered on the same platform earlier. Other smart contract facing the same problem. If price of cryptocurrency used by smart contract go much high or much low it can be irrelevant over time. Stable coin solve this problem, but temporarily, If promoter of stable coin decide to switch the block-chain then it will a more bigger problem to the users.

While developing EXPONA a special oracle based bridge contract technology was used to overcome this problem. If the price of BNB goes up or down, registration fee will be always equivalent to \$100(approximately), means user need to purchase BNB equivalent to \$100 to register. Here with EXPONA always, no matter what is the price of BNB in future and You can play a long time inning with EXPONA.

Peer to Peer distribution of registration fee.

Sponsor Income	20% of Registration fee
Level Income	40% of Registration fee (up to 10 levels divided)
Global Auto-fill matrix	40% ofRegistration fee (Forced matrix 4*5)

Sponsor Income

When ever you will introduce a user to EXPONA and new user do registration using your User ID you will get 20% of the registration fee.

You can introduce EXPONA to someone personally, over a phone call, message, mail or any social media platform.

Level Income (up to 10 levels)

As you sponsor some users and they sponsor further this will make a generation tree. Every user will get 10% of fund allocated for level income(40% of registration fee) for each level from team up to 10 levels.

As the team size will increase the income increase

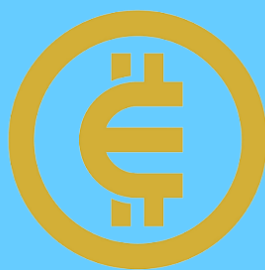

Global Auto-fill Matrix

Global Auto-fill Matrix is a completely passive income. EXPONA is an opportunity for every type of user if any user remains inactive and not make even a single referral even he can make some profit. Global auto-fill matrix is an opportunity for users of investor type to earn BNB.

Global Auto-fill Work as a 4*5 forced matrix, where 4 is width and 5 is depth and will serve as first come first get bases. For this matrix 40% of registration fee will be distributed at each level equally up to 5 levels.

Assured high returns on EXPONA coin

When ever an user register on smart contract he will get sponsor income, level income & Global auto pool matrix income, apart from this every user will get EXPONA coin as a reward . These EXPONA coin will be freezed in users wallet , user can see the EXPONA balance in their wallet. All EXPONA coin will be unfreezed when user will get a single income from auto pool matrix from the fourth level. And when first user will get his EXPONA unfreezed the system will switch the the mode of registration from BNB to EXPONA. Hence the more user will buy EXPONA and less user have their EXPONA coin unfreezed. And a simple law for “demand & supply” will work. There will be always more demand and supply will be less, as a result there is an assurance to get high returns when user will sell there EXPONA in the market.
